Summary

Results-driven IT professional with nearly 5 years of progressive experience across systems engineering, cloud infrastructure, technical support, and cybersecurity. From managing 200+ end users at the helpdesk level to architecting and automating enterprise cloud environments at Cognizant, I have consistently delivered measurable improvements in system performance, security, and operational efficiency. Skilled across AWS, Azure, Active Directory, Office 365, networking, and scripting, with a track record of reducing ticket backlogs, improving fraud detection, and strengthening security posture across diverse enterprise environments. Equally comfortable collaborating with cross-functional teams and owning initiatives end-to-end.

Skills

Cloud & Infrastructure: AWS (EC2, S3, IAM), Azure (AZ-900 certified), VPNs, DNS, DHCP, Network Administration

Systems & Security: Active Directory, Office 365, NTFS Permissions, Patch Management, Phishing & Malware Mitigation, Cybersecurity (Fortinet — In Progress)

Dev & Tools: Python, JavaScript, React, Node.js, HTML/CSS, C#, Tableau, Salesforce, Microsoft Office Suite, ServiceNow/ITSM ticketing

Scripting & Automation: Batch Scripting, PowerShell (basic), SQL (SQL Server, CTEs, Dynamic SQL)

Professional Experience

Systems Engineer I, Cognizant

Dec 2025 – Present | Toronto, Ontario

- Design and maintain cloud infrastructure on Azure, managing compute, storage, networking, and IAM policies to support enterprise-scale application deployments.
- Monitor and troubleshoot network and infrastructure issues across hybrid environments, ensuring high availability and minimal downtime for critical business systems.
- Develop and maintain automation scripts to streamline repetitive administrative tasks, reducing manual effort and improving operational consistency.
- Support cybersecurity initiatives, including vulnerability assessments, access control reviews, and incident response, strengthening overall security posture.
- Provide application support for enterprise systems, diagnosing root causes of outages and coordinating with development teams to drive rapid resolution.
- Collaborate cross-functionally with infrastructure, security, and DevOps teams to implement configuration standards and enforce best practices.

Service Technician II, VC3 (CompuVision Systems Inc.)

Oct 2024 – Dec 2025 | Toronto, Canada

- Resolved inbound service requests on escalation, troubleshooting Active Directory, Office 365, VPN, remote access, DNS, network connectivity, and workstation performance issues.
- Administered user account management, email configurations, NTFS/share permissions, and mobile device setups, accelerating onboarding processes.
- Strengthened cybersecurity posture by identifying and mitigating phishing, malware, and compromised account incidents, improving overall security response time.
- Maintained accurate documentation and ticket management while collaborating with Tier 2/3 teams to ensure timely resolutions and high service delivery standards.

Apple IT Support Tier II, Teleperformance

May 2024 – Oct 2024 | Toronto, Canada

- Identified inefficiencies in backend processes related to email holds, fraud management, and payment blocks that were causing delays and impacting customer satisfaction.

- Streamlined backend operations by implementing improved workflows for shipping investigations, credit creation, and goodwill management in coordination with logistics teams.
- Achieved a 3% reduction in operational delays and a 20% improvement in fraud detection accuracy within 2 months, resulting in measurable gains in customer satisfaction.

IT Support Analyst I, *Starlink Marketing Solutions LTD.*

Feb 2023 – Apr 2025 | Kitchener, Canada

- Provided technical support for 200+ end users, troubleshooting hardware, software, printer, and network issues in person and remotely, achieving a 20% reduction in reported incidents.
- Managed the helpdesk ticketing system end-to-end — receiving, triaging, distributing, and resolving tickets — cutting ticket backlog by 30%.
- Maintained security patch compliance across all end-user devices, improving system security compliance by 25%.
- Configured and managed network systems to ensure secure, efficient connectivity and provided hardware maintenance, including parts ordering and replacement.
- Documented all support issues, resolutions, and time logs in the ticketing system, ensuring accurate records for audit and reporting.

Esports Hub Lead & End User Support Specialist, *Conestoga College*

Sep 2022 – Apr 2024 | Waterloo, Canada

- Led the design and implementation of the Esports Hub system, resulting in a big increase in network performance and a 30% improvement in booking system efficiency.
- Developed and documented technical maintenance guides, reducing troubleshooting time by 25%.
- Provided rapid technical support and resolved complex issues, achieving a 95% participant satisfaction rate.
- Managed network access and registrations, ensuring seamless connectivity and security.

Walmart Associate, *Walmart Canada Corporation*

Nov 2021 – Apr 2024 | Kitchener, Canada

- Led team operations to **improve inventory accuracy by 20%, ensuring better stock management.**
- Organized sales floor and optimized product placement, increasing sales.

Data Management Analyst, *Navkar Institute of Commerce and Science*

Mar 2020 – Aug 2021 | Ahmedabad, India

- Increased data storage efficiency by 35% through optimized AWS cloud architecture and infrastructure management.
- Administered AWS servers and enhanced network and security patch processes, ensuring a robust and scalable cloud environment.
- Leveraged Excel to oversee faculty time recording and scheduling, improving accuracy and operational efficiency.
- Boosted student satisfaction by 25% through data analytics, support optimization, and streamlined reporting.
- Directed cross-functional teams across content creation, IT services, customer support, and facility management.

Education & Certifications

Majors: Computer Programming and Analysis (0057), *Conestoga College*
Advanced Diploma (3 Years)

Sep 2021 – Apr 2024 | Waterloo, Canada

CompTIA A+ (completion certificate), AI, Excel, AZ-900 (Completed), *Certifications, various Institutes*

Fortinet Cybersecurity Associate & AZ-104, *(In Progress)*

Projects

Chef Connect, *Capstone Project*

Jan 2024 – Apr 2024

ChefConnect is an innovative initiative that aims to bridge the gap between professional chefs and culinary enthusiasts.

Esports Website, *Conestoga College*

Dec 2023 – Apr 2024

Reworked entire website, and worked new features for Condors website.

Organizations

Google, *Google Developer Student Club*

Dec 2023 – Aug 2024 | Waterloo, Canada
