

ASHNA K

DATA ANALYST | SQL | POWER BI | EXCEL | PYTHON | TABLEAU | MACHINE LEARNING

Calicut, Kerala, India | +91 6238300663 | ashnakottakal@gmail.com | linkedin.com/in/ashnakottakal | github.com/ashnak7994

PROFESSIONAL SUMMARY

Data Analyst with 2+ years of experience in data extraction, cleaning, transformation, validation, reporting, and dashboard development. Skilled in SQL, Power BI, Excel, Python, and Tableau, with hands-on experience in data modeling, DAX, Power Query, statistical analysis, and machine learning. Experienced in automating reporting workflows, analyzing multi-source datasets, building interactive dashboards, and translating data into actionable business insights. Strong foundation in data science and AI, with practical experience in end-to-end analytics and machine learning projects.

TECHNICAL SKILLS

Data Analysis: SQL, Python, Pandas, NumPy, Statistical Analysis, Exploratory Data Analysis

BI & Visualization: Power BI, DAX, Power Query, Tableau, Advanced Excel, Data Visualization

Machine Learning: Supervised Learning, Unsupervised Learning, Model Evaluation, Predictive Analytics, Scikit-learn

Databases: PostgreSQL, MySQL

Data Engineering: ETL/ELT Concepts, Data Cleaning, Data Transformation, Data Validation, Data Modeling

Tools: Jupyter Notebook, Git, VS Code

PROFESSIONAL EXPERIENCE

IT Engineer | IPCS Global, Calicut | Jul 2024 – Present

- Perform data extraction, cleansing, transformation, and validation across structured and semi-structured datasets to support accurate reporting and analysis.
- Write SQL queries to analyze datasets, answer business questions, and prepare data for reporting and dashboard development.
- Design and maintain interactive Power BI and Tableau dashboards using data preparation, visualization, and analytical techniques.
- Apply data modeling, Power Query, DAX, and visualization principles across analytics projects and internal use cases.
- Deliver 100+ practical sessions covering Python, SQL, Power BI, Tableau, and data analytics to 500+ learners, strengthening communication and stakeholder-facing skills.

Freelance Data Analytics Trainer | Beat Educations, Remote | Dec 2024 – Oct 2025

- Guided end-to-end analytics projects using real-world datasets, covering data cleaning, SQL analysis, Python-based analysis, and dashboard development.
- Created practical analytics exercises and dashboards using Power BI, Tableau, SQL, Python, and Excel.

Data Science and Analyst Intern | ICT Academy of Kerala | Dec 2023 – Jun 2024

- Automated recurring reporting processes using Python and Excel, reducing data handling time by 20%.
- Consolidated and prepared datasets from multiple sources to build 15+ reports and dashboards.
- Performed data cleaning, transformation, validation, and analysis to support reporting workflows.

PROJECTS

Customer Behavior Analysis | Python | PostgreSQL | SQL | Power BI

- Built an end-to-end analytics project on customer shopping behavior, covering data cleaning, exploratory analysis, SQL querying, and dashboard development.
- Analyzed a 3,900-record retail dataset to answer business questions related to revenue, subscriptions, and shipping preferences.
- Developed an interactive Power BI dashboard with KPI cards and filters; identified Clothing as the highest-revenue category and found that 27% of customers were subscribers.

Blinkit Sales Analysis | Power BI | Excel | Power Query | DAX

- Built an interactive sales dashboard analyzing performance by product, region, and time.
- Used Power Query for data cleaning and transformation and DAX for calculated measures and KPI analysis.
- Identified opportunities for improving operational efficiency through dashboard-driven analysis.

HR Analytics Dashboard | Tableau | Excel

- Developed a Tableau dashboard tracking employee attrition, performance, and workforce metrics.
- Cleaned and prepared raw HR datasets in Excel before integrating them into Tableau for analysis and visualization.

Health Insurance Fraud Detection | Python | Machine Learning | SQL

- Built and deployed a machine learning model for health insurance fraud prediction with a live web interface.
- Applied feature engineering and model evaluation techniques to improve precision and reduce false positives.

EDUCATION

Master of Computer Applications (MCA) | University of Calicut | Jul 2021 – Apr 2023

B.Sc. Computer Science | Providence Women's College | Jun 2018 – Mar 2021

CERTIFICATIONS

- Data Analytics Job Simulation — Deloitte Australia (Forage), May 2025
- Career Essentials in Data Analysis — Microsoft, May 2024
- Advanced Data Analytics — Google, Apr 2024
