<https://ramya-vmohan.github.io/Portfolio/> 

Senior Cloud Security and DevOps Engineer with 6+ years of experience securing and automating multi-cloud platforms across AWS, Azure, and GCP. Specialized in embedding security into CI/CD pipelines, Infrastructure as Code, and cloud-native architectures while ensuring high availability and compliance with PCI DSS, SOC 2, and ISO 27001. Passionate about building resilient, secure, and scalable systems using SRE and DevSecOps best practices.

WORK EXPERIENCE

Devops Engineer

Hastings Direct

London, United Kingdom

09/2025 – 05/2026

- Facilitate CI/CD-driven deployments and operations of the Provenir SaaS platform, ensuring secure and reliable cloud releases.
- Manage Snowflake for analytics data ingestion, access control, and performance optimisation.
- Conduct operational and business analysis using Microsoft Excel to generate actionable platform insights.
- Partner with engineering teams to enhance deployment stability, monitoring, and overall platform reliability through DevSecOps and SRE practices.
- Uphold Site Reliability principles, ensuring the platform's scalability and dependability.

Cloud Infrastructure and Networking

Freelancer

Bengaluru, India

09/2023 – 11/2024

- Architected and implemented scalable cloud solutions, automated deployment pipelines, and ensured robust system reliability.
- Specialised in optimising cloud services, enhancing security compliance, and streamlining operations for diverse client projects.
- used Copilot/Cursor for development productivity.
- Participated in security architecture reviews, attack surface analysis, IAM design, compliance assessments, and threat mitigation for cloud-native platforms. Currently expanding expertise into AI threat modeling using MITRE ATLAS and OWASP Top 10 for LLM Applications(Freelancing-Zerberus.ai).

Senior DevOps and InfoSec Engineer

Itilite Technologies Pvt Ltd

Bengaluru, India

05/2020 – 07/2023

- Senior Cloud Security & DevSecOps Engineer with expertise in architecting secure AWS/Azure platforms using Terraform, Python, Ansible, and CI/CD(blue-green deployment) automation. Proven technical lead in AWS security, IAM governance, cloud networking, threat detection, Infrastructure as Code, SRE, and compliance (SOC 2, ISO 27001, PCI DSS). Skilled in designing resilient, scalable cloud-native platforms, security automation, and enterprise-grade DevSecOps solutions.
- Key Expertise:

AWS Security & Architecture:

Deep hands-on expertise across AWS IAM, VPC, WAF, EC2, ALB, Route 53, CloudFront, KMS, Security Groups, CloudWatch, and AWS Config, designing secure multi-account architectures, enforcing least-privilege access, encryption, logging, threat detection, and governance.

GuardDuty, Security Hub for centralised security management across the infrastructure for SIEM.

Integrated the AWS Services(CloudTrail, Cloud watch) with Wazuh and Saner now to handle vulnerability checks and proceed for patch management(IDPS).

DevSecOps & Cloud Automation:

Technical lead in secure CI/CD, Terraform, Python, PowerShell, Jenkins, Azure DevOps, container security, Kubernetes, and Infrastructure as Code, delivering automated security controls, policy enforcement, blue-green deployments, cloud security assessments, incident response, and enterprise-scale AWS security solutions.

DevOps Intern

Itilite Technologies Pvt Ltd

Bengaluru, India

07/2019 – 04/2020

Gained foundational knowledge in cloud computing and networking during a DevOps internship.

Automation testing Intern

Shriram Value Services

Chennai, India

04/2018 – 05/2018

Acquired practical experience in Selenium test automation during an automation testing internship.

EDUCATION

Msc - Cyber Security

Nottingham Trent University

Nottingham, UK

01/2024 – Present

Advanced Certificate Program - Cyber Security

International Institute of Information Technology(IIIT-B)

Bengaluru, India

12/2022 – 08/2023

MTech Integrated - Software Engineering

Vellore Institute of Technology (VIT)

Chennai, India

07/2015 – 04/2020

SKILLS

Programming & Scripting -

Python (Flask, Django), Bash, Groovy, PHP, HTML, CSS, ReactJS

Cloud Platforms -

AWS, Microsoft Azure, GCP, DigitalOcean, Snowflake, Provenir

AWS Services -

EC2, ECS, EKS, Lambda, RDS (MySQL), S3, Glacier, Route53, CloudWatch, OpenSearch, SQS, VPC, ALB/ELB

DevOps & Infrastructure -

Terraform, Ansible, Docker, Kubernetes, Jenkins, Azure DevOps, Git, AWS CLI, Azure CLI

Infrastructure as Code (IaC), CI/CD, Blue-Green Deployments, Rollback Strategies

Environment Provisioning, Configuration Management, IAM

Databases & Messaging -

PostgreSQL, MySQL, Redis, Oracle, RabbitMQ, Kafka/Zookeeper, AWS SQS

Monitoring & Observability -

Datadog, ELK Stack (Elasticsearch, Logstash, Kibana), CloudWatch, Splunk, SIEM, Monitoring

Alerting, RCA, Performance Optimization

Networking -

VPC, VPN, Internet Routing, Load Balancers (ALB/ELB), DNS, SSL/TLS, Certificate Management

Security & DevSecOps

SOC2, ISO 27001, PCI DSS, IAM, PAM, Active Directory, SAST, DAST, EDR, NDR, SIEM, Firewall

Vulnerability Management, Security Automation, Security Scanning, Secrets Management

Server Hardening, Patch Management, Cloud Security

Incident Response & SOC -

Incident Response, Tier-1 & Tier-2 Support, Alert Analysis, Alert Triage, Escalation

Log Analysis, Log Correlation, Incident Timeline Reconstruction, Endpoint Isolation

Account Disablement, SOC Playbooks, SOP Development, SLA-based On-call, False Positive Reduction

SRE & Platform Engineering -

Site Reliability Engineering (SRE), High Availability, Distributed Systems

Cloud-Native Architecture, Resilient Systems, SaaS Platform Operations

Deployment Lifecycle Management, Production Reliability, Operational Excellence

Professional Skills -

Business Analysis, Stakeholder Communication, Cross-functional Collaboration, Agile, Advisory

Risk Assessment, Security Awareness, Operational Efficiency, Documentation

GitHub Copilot and Cursor AI

LANGUAGES

English

Proficient

PROJECTS

Automation -CI/CD

Bengaluru, India

05/2020 – 08/2023

Designed a cloud-native AI assistant using Python, OpenAI APIs, and REST services to automate engineering workflows. Integrated AI-assisted code generation, infrastructure automation, and deployment using Terraform, Docker, Kubernetes, Jenkins, and GitHub. Implemented IAM, secrets management, monitoring, and security validation aligned with DevSecOps best practices. Deployed on AWS with scalable cloud-native architecture and automated CI/CD pipelines.

CIS-Patching- AI-OS Hardening

Nottingham, United Kingdom

06/2024 – 08/2024

My experience with CIS Benchmark implementation complements AI security by securing the infrastructure that AI workloads run on. I automated OS hardening, vulnerability remediation, and compliance validation, creating secure cloud environments that align with DevSecOps practices. Those same controls are essential for hosting AI agents and LLM-based applications securely.

AI- Security Testing Platform

United Kingdom

11/2025 – 02/2026

Developed a secure AI testing platform by containerizing LLM evaluation workflows using Docker and Python. Integrated OpenAI APIs to automate adversarial prompt testing, evaluating model resilience against prompt injection, jailbreak attempts, and malicious inputs. Built reproducible testing environments to execute AI security validation scripts, capture detailed interaction logs, and analyze model behavior for potential vulnerabilities. Streamlined AI security testing through automation, enabling consistent threat assessment, secure deployment practices, and improved governance for AI-powered applications
