LinkedIn: <https://www.linkedin.com/in/hemanth-eswararaju-b563a7268/> |  Bengaluru, India

PROFESSIONAL SUMMARY

- Highly skilled and certified MuleSoft Developer with 6+ years of experience in designing, developing, and deploying robust integration solutions using Mule 4, DataWeave, and Anypoint Platform.
- Proven track record in delivering API-led connectivity solutions, modernizing legacy systems, and automating business processes. Recognized for technical excellence, problem-solving abilities, and strong client interaction skills.
- Extensively work on both Mulesoft development and support process. Have experience working Mule API manager, Design Centre, API monitoring etc.
- Experience in Unit testing with Munits. Good experience on version management tools like GIT. Experience in end-to-end life cycle of APIs from design, development to deployment and monitoring.
- Worked on different connectors, flow controllers, batch and error handling components, and different integration patterns.

TECHNICAL SKILLS

Languages: DataWeave, XML, JSON, SQL

MuleSoft Tools: Anypoint Studio, Anypoint Platform, API Manager, Runtime Manager, Exchange, Design Centre, API Monitoring, MQ

Protocols & Standards: HTTP, HTTPS, SOAP, REST, JMS, FTP, SFTP

Databases: MySQL, Oracle

CI/CD & DevOps: Jenkins, Maven, Travis

Monitoring & Logging: Anypoint Monitoring

Other Tools: Postman, JIRA, Confluence

CERTIFICATIONS

- ✓ MuleSoft Certified Developer – Level 1
- ✓ MuleSoft Certified Developer – Level 2

PROFESSIONAL EXPERIENCE

- Senior MuleSoft Developer
Finastra | Bangalore, India | April 2024 – Present

Key Responsibilities:

- Designed and implemented scalable APIs using API-led connectivity (Experience, Process, System layers).
- Developed complex integrations using DataWeave, Transform Message, Choice Router, For Each, Batch Processing, etc.
- Managed and deployed applications on CloudHub and done troubleshooting, debugging for errors.
- Applied exception handling, logging, and monitoring best practices using Anypoint Monitoring.
- Collaborated with business analysts and architects to gather requirements and design APIs.

Projects:

- **Finance Integration Platform**
 - Developed 5+ and Supported 15+ APIs for customer, contact, Invoice, Employee, HRC, Pagero invoice integrations.
 - Reduced processing time by 20% using optimized flows, async mechanism wherever applicable and event driven architecture.
 - Integrated multiple systems with NetSuite and independently handled end to end for Pagero integration.
 - Coordinate in all testing phases and worked closely with testing team to create a baseline for the new application.
 - Perform unit testing through MUnit test cases for mule flows.

Recognitions:

- Awarded multiple times for employee of the month, successful delivery, code optimizations and for organizing team building activities.
- Received Kudos from Clients for successfully handling Pagero Invoice Integration.

- MuleSoft Developer
Accenture | Bangalore, India | Dec 2021 – Apr 2024

Key Responsibilities:

- Design and developed various types of flows which are integrated with Salesforce, Amazon Web Services, and FTP , SFTP , REST Api's.
- Created reusable sub-flows and custom connectors for internal teams.

- Responsible in developing integration workflows using Mule ESB framework, implemented DataWeave and content-based routing using Mule ESB.
- Worked on different integration patterns mainly with scheduled based integrations extensively working with Salesforce and SFTP integration. Handled bulk data loads, error reporting and support.

Projects:

- **Healthcare/Pharmaceutical client**

- Designed and implemented scalable API-led connectivity solutions for research and patient management systems.
- Developed interfaces to connect clinical trial systems, EHRs, and third-party healthcare services.
- Built robust APIs for order creation, shipment tracking, and return management.
- Provided production support and implemented alerting and monitoring using Anypoint Monitoring.

Recognitions:

- Got “**Accenture Growth catalyst**” award for the contribution in the offshore client value creation.
- Applauded by the client for various on-time deliverables.

- MuleSoft Developer

Cognizant | Bangalore, India | May 2021 – Sep 2021

Key Responsibilities:

- Design and developed various types of flows which are integrated with Salesforce, Amazon Web Services, and FTP , SFTP , REST Api's.
- Design and develop enterprise services API specification using RAML and REST schema.
- Implement Exception Handling, Logging, and Error Handling. Create Mule application that uses connectors SFDC, Message Transformer, Choice Exception Strategies, Batch processing.
- Worked in agile methodology and assisted in all phases of software testing and postproduction support.

- Market Research Executive

Silicon Media Technologies | Bangalore, India | March 2019 – Mar 2021

Key Responsibilities:

- Design and develop enterprise services API specification using RAML and REST schema..

- Design and Implement RESTFUL Web Services using various data format (JSON, XML) to provide an interface to the various third-party applications.
- Extensively used Mule components such as File Transport, HTTP, SFTP Transport, Salesforce. Worked on bulk handling of Salesforce data using SF bulk job and handled errors efficiently.
- Worked in agile methodology and assisted in all phases of software testing and postproduction support.

EDUCATION

B.Tech in Electrical and Electronics Engineering

Jawaharlal Nehru Technological University, Anantapur | 2017

STRENGTHS

- Strong expertise in API-led connectivity.
- Efficient in working independently and with cross functional teams.
- Excellent client communication and team mentoring skills.

PERSONAL DETAILS

Languages Known: English, Telugu, Hindi

Availability: 60 days' notice

Willing to relocate/travel: Yes
