

AJINKYA BIRWADKAR

Head of PMO | Senior Technical Project Manager | Program Delivery Leader | Digital Transformation

Pune, India | Open to relocate / hybrid | ajinkya.birwadkar@gmail.com | +91 7715906118 | LinkedIn: ajinkya-birwadkar-18245121

PROJECT / PMO LEADERSHIP SUMMARY

Project and PMO leader with 14+ years of experience delivering enterprise technology, automation, eCommerce, supply chain, IAM, and digital transformation programs across North America and India. Known for leading cross-functional delivery from solutioning through go-live, building governance and operating discipline, and aligning business, technical, and executive stakeholders on outcomes, risk, budget, and execution. Track record includes leading 15+ end-to-end implementation and support programs, steering multi-million-dollar initiatives, and delivering complex programs across retail, government, energy, manufacturing, and regulated environments.

CORE STRENGTHS

Program & PMO Leadership	Portfolio governance, RAID management, executive reporting, delivery control
Project Delivery	Agile / Scrum, sprint planning, release management, cross-functional coordination
Commercial & Financial Oversight	Resource planning, pricing models, P&L / ROI tracking, profitability visibility
Transformation Domains	Automation, eCommerce, order management, supply chain, IAM, cloud, compliance

PROFESSIONAL EXPERIENCE

Tangentia Inc. | Head of PMO / Technical Project Manager / Director India / Practice & Delivery Leader | 2013 - Present

- Lead PMO and delivery governance across 15+ end-to-end implementation and support programs, directing distributed teams across business analysis, architecture, development, QA, infrastructure, and support functions.
- Drive project lifecycle execution from pre-sales solutioning and estimation through planning, sprint execution, risk management, stakeholder governance, go-live, and hypercare.
- Built resource allocation, pricing, licensing, and profitability tracking models that improved delivery visibility and aligned commercial decisions with project outcomes.
- Conduct technical reviews and solution design assessments to strengthen delivery feasibility, reduce downstream risk, and improve implementation quality across complex enterprise programs.
- Run executive-level project controls including milestone planning, issue escalation, defect governance, budget tracking, ROI visibility, and cross-functional decision management.
- Led Agile adoption and sprint-based delivery practices across teams, improving delivery cadence, team alignment, and transparency throughout the project lifecycle.
- Managed ISO 27001, ISO 9001, SOC, and PCI-aligned governance activities to ensure delivery, operations, and security controls remained audit-ready across customer and internal programs.

SELECTED FLAGSHIP PROGRAMS

Liquor Control Board of Ontario (2024-2026) | PMO Head - Led a multi-million-dollar transformation program that enabled 8,000+ newly licensed stores across Ontario to sell beverage alcohol, delivering eCommerce and order management platform enhancements under stringent government and market deadlines.

LCBO Beer in Grocery (2015-2022) | Technical Project Manager - Led delivery of eCommerce and order management capabilities connecting suppliers and grocery chains such as Loblaw's, Sobeys, and Metro, helping expand consumer access to nearly 3,000 beverage alcohol products across Ontario.

Suncor | Program Lead - Directed migration from IBM RPA to Automation Anywhere and orchestrated deployment of 100+ high-impact bots, redefining the organization's automation landscape through structured transition planning and execution.

Reliance Retail | Delivery Lead - Spearheaded end-to-end implementation of the Tangentia Scan and Pack solution, improving scanning and packing workflows and strengthening supply chain efficiency through coordinated cross-functional delivery.

Barnes & Noble | Transition / Managed Services Lead - Led IBM Order Management managed services transition with focus on service continuity, stakeholder alignment, quality assurance, and controlled operational handover.

LCBO Security & IAM Operations | Security / Program Lead - Led identity and security operations for a high-visibility Ontario government program supporting approximately 35,000 users, 4-5 federated SSO applications, and 99.9% availability while sustaining SOC controls since 2015, ISO 27001 governance since 2017, and PCI compliance since 2023.

Product Director – TiA SaaS Portfolio (Tangentia)

Visionary product leader driving the strategy, evolution, and market positioning of Tangentia's TiA SaaS portfolio—an integrated suite of AI, automation, EDI, and digital commerce platforms powering autonomous enterprise operations. Spearheaded the development of agentic AI-driven products (AI agents, intelligent automation, and supply chain solutions), embedding governance, security, and scalability as core differentiators. Defined product roadmaps and platform architecture enabling seamless integration across ERP, EDI, and enterprise ecosystems, delivering measurable outcomes such as process automation, real-time visibility, and operational

efficiency. Influenced executive strategy and go-to-market initiatives to position TiA as a next-generation, enterprise-grade AI and automation platform.

ADDITIONAL DELIVERY PORTFOLIO

• Del Monte - Digital transformation using AI-driven applications and robotic process automation	• Symphony Air Coolers - Robotic process automation and digital transformation
• Sonepar India - Robotic process automation and digital transformation	• Surati Sweet Mart - Power Platform implementation
• VVDN and HP - EDI implementation	• Popular Motors / Popular Automobile - Robotic process automation implementation
• Indus Motors - Robotic process automation implementation	• Canpotex - Autonomous enterprise and digital transformation implementation
• Technical Standards and Safety Authority Canada - Autonomous enterprise and digital transformation implementation	• Cogeco - Autonomous enterprise and digital transformation implementation
• Summit Wealth Financial - Automation Anywhere implementation	• Gore Mutual - UiPath solution implementation
• Federated Co-op - IBM SAM / SIM managed services transition and IAM operations strategy	• Cancer Care Ontario - Microsoft Identity Manager to Workday HRMS integration
• LCBO - IBM Security Access Manager upgrade	• Wind Mobile Canada - IBM Control Desk implementation
• Dick's Sporting Goods - IBM TAS (eZio Server) MFA authentication implementation	• Coal India - Autonomous enterprise and digital transformation program
• TiA - Tangentia SaaS product development	

EDUCATION & CERTIFICATIONS

- PMI - Generative AI for Project Managers
- Automation Anywhere - Program Manager; Advanced RPA Professional; Solution Architect
- UiPath - Solution Architect; Security Training; Infrastructure Training
- PGDM - Computer Network Technologies
- Centennial College, Toronto - School of Engineering Technology and Applied Science
- Bachelor of Commerce - University of Pune
