Summary

ISTQB Certified Quality Analyst with 2 years of experience specializing in manual, web, RPA/IPA/APA, and API testing across enterprise and automation platforms. Experienced in Agile/Scrum environments and the Software Testing Life Cycle (STLC), with expertise in functional, regression, integration, and UAT testing. Proven ability in validating end-to-end workflows, ensuring data accuracy, identifying defects, and supporting the delivery of stable and high-quality software solutions.

Skills

- Web Application Testing
- RPA/IPA/APA Process Testing
- Regression, Functional & Integration Testing
- Database (SQL)
- API Testing
- AI Chat & GenAI / Agentic AI-Assisted Testing

Work Experience

Tangentia India Technologies Private Limited

Jul 2024 – Present

Quality Analyst

Roles and Responsibilities

- Participated in the full **Software Testing Life Cycle (STLC)** including requirement analysis, test planning, test case design, execution, defect reporting, and closure.
- Designed and executed **manual test cases** covering functional, regression, system integration, and user acceptance testing (UAT) scenarios for web applications, RPA workflows, and Agentic Process Automation (APA), improving overall test coverage by approximately **35%**.
- Performed end-to-end testing of a **WordPress-based Tangentia's website** and its integrated AI chat agent, identifying and logging **350+ functional defects**, significantly improving release stability and reducing post-release defect leakage by approximately **30%**.
- Performed **weekly smoke testing of the Tangentia's website** to verify core functionalities such as navigation, forms, APIs, and critical user workflows, ensuring platform stability and early detection of high-impact defects before releases.
- Executed cross-browser and cross-device testing across **Chrome, Edge, Safari, and mobile devices** using **LambdaTest** to ensure UI responsiveness, functional consistency, and compatibility across environments.
- Logged, tracked, and validated defects using **JIRA**, supporting retesting, regression testing cycles, and root-cause analysis while collaborating closely with developers to ensure timely issue resolution.
- Supported **User Acceptance Testing (UAT)** by preparing UAT checklist, assisting stakeholders during validation, and generating test execution reports and release readiness summaries.
- Conducted **API testing using Postman**, validating request-response behavior, status codes, and payload data accuracy for enterprise APIs.
- Tested and validated APIs for **Purchase Orders (PO), Advance Shipment Notices (ASN), and Invoice processing** for the company product **TiA** using Postman. Designed positive and negative test scenarios based on API documentation and verified data integrity across API responses.
- Validated **Automation Anywhere RPA bots** by executing end-to-end test scenarios and verifying workflow logic, exception handling, and data processing accuracy.

- Conducted functional testing of **Microsoft Power Apps–based applications**, validating UI behavior, data validation rules, and error-handling scenarios.
- Evaluated **Agentic Process Automation (APA)** workflows using a structured evaluation framework to detect reasoning errors and hallucinations, assessing responses for completeness, faithfulness, and relevance, improving response accuracy by approximately **30–35%**.
- Collaborated with **developers, QA leads, product teams, and business analysts** to analyze requirements, clarify acceptance criteria, and ensure test coverage aligned with product functionality and release goals.

Education

Marian College of Engineering2024
Bachelor of Technology in Computer ScienceCGPA: 7.16

Key Project Experience

1. TiA – Supply Chain Management Application (North America): [2024 to Present]

An enterprise supply chain management application that processes Purchase Orders (POs), Advance Shipping Notices (ASNs), invoices, and trading partner transactions across integrated EDI workflows.

Key Responsibilities: Performed end-to-end manual testing of PO, ASN, and invoice workflows, including EDI validation and trading partner integration testing. Validated business rules, API responses, and data consistency across integrated systems. Executed functional, regression, integration, and UAT testing, prepared test scenarios and test cases, reported and tracked defects in JIRA, and collaborated with development and business teams to ensure high-quality software releases.

2. Current Lighting – CurrentIQ Chat Agent Testing (North America): [2024 to 2025]

An AI-powered chat agent solution developed for handling product search, warranty support, and intelligent customer assistance workflows using crawler-based data retrieval across enterprise systems.

Key Responsibilities: Designed and executed test cases and AI prompts for validating product retrieval, warranty support, customer assistance, and artifact-related workflows in an AI-powered chat agent. Performed AI chat validation, API testing, regression testing, and backend data verification using crawler-generated product data stored in JSON format. Identified hallucination and factual accuracy issues, reported defects, validated fixes, and contributed to improving chatbot response quality. Collaborated with teams during UAT activities and prepared client-facing UAT testing guidelines.

3. Akshaya Patra – RPA Finance Automation Solution (India): [2024 to 2025]

An RPA-based finance automation solution developed for streamlining donor reconciliation, bank reconciliation, and vendor onboarding processes. The bots automated financial data processing, reconciliation workflows, and validation activities across multiple systems.

Key Responsibilities: Performed end-to-end testing of RPA bots including Donor Reconciliation, Bank Reconciliation, and Vendor Onboarding processes. Validated workflow logic, financial data accuracy, API responses, database validations, and bot execution outcomes. Executed functional, regression, integration, and UAT testing, logged defects, and collaborated with cross-functional teams to ensure stable automation releases.
