

ABISHA RAJESH

Senior QA Engineer | Manual, APA/AI Testing, Automation & API Testing

☎ +91 9400174498 | ✉ abishadashlin@gmail.com | LinkedIn: linkedin.com/in/abisha-rajesh-2ba5b746

PROFESSIONAL SUMMARY

Senior Quality Assurance Engineer with 6.5+ years of experience specializing in manual, web, and API testing across e-commerce, healthcare, automation, and enterprise platforms. Proven track record in functional, regression, UAT, and integration testing. Adapt at validating end-to-end workflows, ensuring data accuracy, and delivering high-quality software solutions.

CORE SKILLS

- Functional | Regression | UAT | Performance Testing
- API Testing (Postman), Selenium WebDriver, Core Java, Page object model(POM)
- Agile-Scrum | SDLC | STLC
- APA/AI Testing (LLM scoring, hallucination detection, agent evaluation frameworks)
- RPA Testing (Automation Anywhere)
- SQL Data Validation
- Tools: JIRA, Zoho, Appium, TestLink, JMeter

EDUCATION

M.E. Computer Science Engineering

2013 – 2015 | CGPA: 8.2

B.E. Computer Science Engineering

2009 – 2013 | CGPA: 7.8

Roles & Responsibilities

- Performed **Functional Testing, Regression Testing, Integration Testing, System Testing, UAT Testing, and API Testing** for web-based enterprise applications.
- Designed, executed, and maintained detailed **test cases, test scenarios, and test data** based on business requirements and user stories.
- Worked on **Selenium WebDriver with Java** for automation script execution, debugging, and maintenance.
- Experience with **TestNG, Maven, Page Object Model (POM)** concepts.
- Conducted **REST API Testing** using **Postman** by validating request/response payloads, status codes, authentication, and business rules.
- Performed **SQL database validation** to verify backend data integrity and end-to-end workflow accuracy.

- Worked in **Agile Scrum environment**, participating in sprint planning, daily stand-ups, requirement analysis, defect tracking, and retrospective meetings.
- Performed **Cross-Browser Testing** across Chrome, Firefox, and Edge to ensure application compatibility and responsiveness.
- Validated **end-to-end workflows**, integrations, payment gateway functionality, ERP integrations, and business process automation flows.
- Used **Git** for version control and code repository management.
- Conducted **Smoke Testing, Sanity Testing, Retesting, and Regression Testing** during release cycles.
- Collaborated closely with developers, business analysts, and stakeholders for requirement clarification, defect resolution, and quality assurance activities.
- Performed testing for **AI/APA workflows**, including validation of LLM outputs, relevance scoring, and workflow accuracy.
- Tested **RPA automation workflows** using **Automation Anywhere** for invoice processing, ERP validation, and workflow automation.
- Supported junior team members through **knowledge sharing, onboarding, and defect analysis discussions**.
- Prepared and maintained **test reports, execution summaries, and defect metrics** for project stakeholders.

KEY PROJECT EXPERIENCE

Sonepar – Caterpillar & Perkins (RPA)

Nov 2025 – Present

- Performed functional, regression, and UAT testing for invoice upload, validation, ERP posting, and digital signature workflows.
- Validated business rules, workflow execution, and data integrity for RPA processes.
- Conducted end-to-end testing of invoice processing and automation workflows.

Current Lighting – APA (Edison NLP Search Agent)

Oct 2025 – Nov 2025

- Evaluated LLM outputs using completeness, relevance, and faithfulness scoring.
- Validated end-to-end user flows including distributor routing and customer support assistance.
- Performed functional and regression testing for AI-powered search workflows.

EESL – E-commerce Tracking Platform

Sep 2023 – Dec 2024

- Tested complete order tracking and fulfillment workflows for a web-based e-commerce platform.
- Validated payment gateway integrations and seller-buyer communication modules.
- Conducted cross-browser testing across Chrome, Firefox, and Edge.
- Executed regression and integration testing for multiple releases.

Sonepar – Tata Steel RPA

Feb 2023 – Jun 2023

- Performed functional and regression testing of Automation Anywhere bots responsible for

PO-to-SO creation.

- Validated ERP integrations, data mapping, and automation workflows.
- Contributed to reducing order creation time from 5–6 minutes to 2–3 minutes.

Reliance Scan & Pack

Nov 2022 – Jan 2023

- Performed end-to-end testing of vendor-side scanning and packing workflows.
- Validated auto-generated documents and scanned data accuracy.
- Conducted integration testing for backend workflow validation.

VIP Healthcare Platform

Oct 2021 – Nov 2022

- Performed API, functional, regression, and integration testing for healthcare web applications.
- Validated patient, product, and order management workflows.
- Conducted SQL validation to ensure backend data integrity and compliance.

InScholaris – AI Matching Platform

Sep 2020 – Sep 2021

- Performed functional and API testing for AI-based student-employer matching workflows.
- Validated search results, filtering functionality, and business rule implementation.
- Tested end-to-end workflows across student and employer portals.
- Involved in regression suite execution and validation using Page Object Model (POM)

Tabcon Gaming

Jan 2020 – Aug 2020

- Performed manual and API testing for gaming applications and backend services.
- Validated core gameplay functionality, user interactions, and application stability.
- Executed regression testing during release cycles.

CERTIFICATIONS

- Certified Software Tester (2019)
- Mobile App Tester (2022)
- Outstanding Teamwork Award – EESL (2024)
