- balajis2998@gmail.com
- Trivandrum, India.
- www.linkedin.com/in/balajis7

PROFESSIONAL OVERVIEW

Senior QA Engineer with 5+ years of experience in Automation, Manual AI testing within Agile environments, specializing in Web Applications, AI Agents, RPA/IPA/APA processes, and Chatbot testing. Skilled in Core Java, Selenium WebDriver, Cucumber BDD, Maven, SQL, Postman, and POM framework design. Experienced in functional, regression, integration, API, and database testing with hands-on exposure to CI/CD processes using Jenkins and GitHub. Strong ability in automation framework development, defect management (JIRA), and delivering high-quality software solutions across the SDLC.

SKILLS

- Selenium WebDriver | BDD Cucumber | Core Java
- Automation & Manual Testing
- Test Automation Framework Design (POM, Maven)
- AI Chatbot & GenAI / Agentic AI-Assisted Testing
- API Testing & Automation (Postman, BDD Cucumber, JVM Reporting)
- Web Application Testing
- RPA / IPA / APA Process Bot Testing
- Regression, Functional & Integration Testing
- Database (SQL)
- Maven, Jira & Jenkins
- Git Hub

WORK EXPERIENCE

Senior QA Engineer

Tangientia India Technologies Private Ltd.

Trivandrum, India | 2023- Present

Roles and Responsibilities

- Led QA initiatives by defining **Automation testing** and **AI Testing F1 Scoring** strategies, **scalable BDD frameworks**, and quality processes to ensure reliable and efficient software delivery.
- Designed, developed, and maintained automation frameworks using **Core Java, Selenium WebDriver, Cucumber BDD, Maven, and POM** architecture for web application testing.
- Performed manual **API testing using Postman** and validated backend integrations, request/response handling, and data integrity through SQL database validations.
- Applied **Agentic AI and GenAI-assisted testing** approaches to enhance **test case generation, defect analysis, test data preparation**, and overall testing productivity.
- Executed automation and manual testing for Web Applications, RPA, IPA, and APA bots across **multiple business domains in Agile environments**.
- Performed **database testing** using SQL queries for backend data validation, data consistency checks, and workflow verification.
- Validated **end-to-end business workflows for E-commerce (B2B/B2C), Supply Chain, and CRM** applications through **functional, regression, integration, and database testing**.
- Performed automation testing for **RPA and AI-driven business process workflows** to ensure process accuracy, stability, and reliability.
- Integrated automation execution with tools such as **Jira, Maven, Jenkins, GitHub, and SQL databases** to support **CI/CD-based** quality assurance processes.
- Collaborated with developers, business teams, and cross-functional stakeholders for defect management, test planning, and continuous quality improvement.

Software Test Engineer

Moulton Technology

Chennai, India | 2020- 2023

Roles and Responsibilities

- Executed manual and automated testing using Selenium with Java, Cucumber (BDD), POM, and data-driven frameworks for web and mobile applications.
 - Analyzed functional requirements and user stories to design effective test cases and automation scripts, ensuring full coverage.
 - Identified web elements using robust locator strategies and managed defects end-to-end using JIRA and Git.
 - Worked independently and collaboratively, applying OOP concepts to improve test quality, automation efficiency, and overall software reliability.
-

EDUCATION

Diploma in Computer Engineering

Government Department of Technical Education

2018

KEY PROJECT EXPERIENCE

1. TIA – Supply Chain Management Application (North America): [2023 to Present]

An enterprise supply chain application that processes Purchase Orders (POs), generates Advance Shipping Notices (ASNs), and creates Trading Partner Invoices.

Key Responsibilities: Performed end-to-end manual and automation testing from scratch using Java, Selenium, and Cucumber (BDD framework). Designed test scenarios and Gherkin feature files, automated PO, ASN, and invoice workflows, validated EDI and trading partner integrations, ensured data accuracy across systems, executed regression suites, logged defects, and supported stable releases.

2. Heartland – Agentic AI Sales Automation (North America): [2024 to 2025]

AI-driven agentic process automation solution built for the sales domain, leveraging multiple autonomous AI agents to identify prospects from online sources, enrich and store prospect data in a centralized database, and execute personalized outreach campaigns. The system analyzes prospect responses using AI-based sentiment analysis and classification, dynamically categorizing leads into Hot, Warm, or Cold to optimize sales follow-up strategies.

Key Responsibilities: Led QA strategy, created test plans and test cases, validated AI agent workflows, sentiment & classification logic, verified database accuracy, tested automated email outreach and follow-ups, and ensured end-to-end quality of agentic automation

3. EESL Website – E-Commerce Platform (India): [2023 to 2024]

An e-commerce website for selling electrical products.

Key Responsibilities: Designed and developed end-to-end automation test scripts from scratch using Java, Selenium, and Cucumber (BDD framework). Created Gherkin feature files for business-readable test scenarios, built reusable step definitions, automated critical workflows (product search, cart, checkout, order confirmation), executed regression suites, logged defects, and ensured application quality and release stability.

ACHIEVEMENTS

Awarded the **Outstanding Leadership Award** for demonstrating exceptional leadership, team coordination, and delivery excellence.

Tangentia India Technologies Private Ltd.

2025

Awarded the **Outstanding Teamwork Award** for collaborative excellence on the **Heartland AI Agentic Process Automation** project.

Tangentia India Technologies Private Ltd.

2025

Awarded the Mentorship Award for consistently supporting, mentoring, and upskilling team members, contributing to improved team performance and quality outcomes.

Tangentia India Technologies Private Ltd.

2024
